

## FM-200 Series

The FM-200 is our largest workhorse and a best seller that meets today's demanding standards. The heavy duty feed chains and link type friction free holddowns form the base of this unique machine. The machine takes the raw board edges that were fed into the "Edge Machine System" are now completely shaped, sanded, finished and for many products require no other treatment for operation.

As with all Fletcher Machine products, we offer full parts and maintenance item inventory and the dependability and service that Fletcher Machine has been known for since 1962.
